## Announcements

IGCP 127: Proterozoic Geochemistry. Indian National Committee (INC), for the International Geological Correlation Programme (IGCP) has approved Indian participation in Project 217 on Proterozoic Geochemistry. This project will emphasise a geochemical comparison of early and middle Proterozoic with the Archaean in an attempt to understand secular changes in crustal evolution. The focus will be on problems related to Proterozoic supracrustal associations, detrital sediments, mafic dykes, granites, anorthosites, high-grade metamorphic rocks and associated mineralisation.

A number of research problems have been taken up by the Indian Working Group within the above broad framework. Work on related problems is also being pursued at different scientific institutions and University Departments. Participation from all researchers is invited to enrich Indian contribution to this Project. For a close interaction among all those working on problems releated to IGCP Project 217, a workshop is proposed to be organised at a suitable time.

Communication in this connection may be made to: The Convenor, IGCP 217 Geochronology and Isotope Geology Division, Geological Survey of India, 29 Jawaharlal Nehru Road, Calcutta-700 016.

Seminar on Recent Geoscientific Studies in the Arabian Sea off India, 25 – 27 August, 1987. Organised by the Geological Survey of India, Marine Wing, at Mangalore. For further particulars contact:

B. R. J. Rao Geological Survey of India Mangalore 575 003.

## **NOTICE**

The Office of the Geological Society of India has been shifted to its own building effective from 1st January 1987. All correspondence in future may please be addressed to:

Geological Society of India 63, II Floor, Basappa Layout Gavipuram Extn. Bangalore 560 019
