

ANNOUNCEMENTS

XVII Congress of the International Society for Photogrammetry and Remote Sensing (ISPRS) August 2-14, 1992, Washington, D.C., USA. The ISPRS, representing 85 member countries, will hold its Quadrennial Congress in the United States for the first time in 40 years, providing a major exhibition and international summary of cooperation and developments in relevant science, engineering, technology and systems. More than 100 technical sessions will feature state of the art, tools and techniques used to monitor our changing world. Plenary and special sessions will address timely issues for multi-nation cooperation. Concurrent meetings include the 'Global Change' Convention of the American Society for Photogrammetry and Remote Sensing and the American Congress on Surveying and Mapping, the International Geographical Union's 27th Geographical Congress, special tutorials by experts in ISPRS, sessions by the International Union of Surveying and Mapping, and a United Nations Seminar for Developing Countries.

Speciality areas will feature developments in imaging systems, mathematical analysis, imagery interpretation and applications, processing and analysis systems, cartographic applications, remote sensing and photogrammetry, close range photogrammetry and machine vision, satellite systems, navigation, and optical and microwave sensors.
