

BOOK REVIEW

'BIBLIOGRAPHY ON EARLY INDIAN GEOLOGY' up to 1850.
Geological Survey of India, Library Publication Series, No.34, 53p., 1994.

We welcome the publication 'Bibliography of Early Indian Geology' (up to 1850, Sl. No.3) of the Library Publication Series of the Geological Survey of India. The compiler Sri. Deepak Kumar Nag has rendered a distinct service to Indian Geology by bringing out this bibliography of rare publications on Indian geology.

We only wish that the arrangement of entries had been made alphabetically instead of according to year of publication. The subject index should have been more exhaustive to make it more useful to the research community.

We are glad to be assured that most of the rare publications are available in the Archives of the Survey and we trust it will be possible for the Survey to make available xerox copies of those publications in which researches outside the Survey are interested.

The book is elegantly produced and must be on the shelves of all the libraries in the country.
