

Presence of glauconite and kaolinite has additionally been observed at this locality. The evidence is suggestive of the source of sediments to lie in the vicinity in the near shore areas.

Acknowledgements: The authors wish to accord their gratitude to the competent authority of ONGC for granting permission to publish this paper. We are grateful to Shri.P.S.N.Kutty, GGM-Basin Manager, Cauvery Basin,

ONGC, Chennai for permission to carry out this work. We wish to acknowledge Dr.D.S.N.Raju, Retd. DGM (Geol), ONGC for his encouragement for this work. Thanks are due to Shri B. Bhaskaran, Suptdg.Geologist for his assistance in labotratory analysis. S/Shri K.Parthiban, R.Parthiban and Selva Raj are acknowledged for their help in collection of samples. The views expressed are those of the authors and not necessarily of the organisation to which they belong.

New Release

Geology of Haryana and Delhi

By
Jawahar Lal Thussu

This publication brought out under the text-book series of the Society, covers a crucial segment of the heartland of India comprising the states of Haryana and the National capital Region of Delhi.

Authored by a former officer of the Geological Survey of India with rich experience in mapping the Quaternaries of Haryana, the text-book attempts to summarise the geological history of the region for the student, researcher and the professional alike.

An overwhelming part of Haryana and Delhi are covered by unconsolidated Quaternary alluvial sediments with minor areas occupied by Proterozoics and Tertiaries in the southwest and northeast respectively. The author has in addition to geology and structure, dealt with also the mineral resources, water quality, river migration and environmental aspects impinging on this rapidly urbanizing, predominantly agricultural 'Yamuna-Indus' interfluvial tract of land. He has also touched upon the geophysical, geothermal and also palaeontological aspects of the region of relevance.

The publication would be of immense value as a succinct introduction to the geology of Haryana and Delhi to all the interested.
