

From The Principal's Desk

It gives me immense pleasure to note that the second issue of "Reason", the technical magazine of our college launched last year, is seeing the light of the day soon.

It goes without saying that publishing a technical magazine from its own resources for a government engineering college is a difficult proposition. Yet this has been made possible as all of us – teachers, students and staff alike – were intent on bringing out a technical magazine of the college on a regular basis. 'Reason' is our way of proclaiming to the world that, as an institution, we really want to stand out and be counted.

May God give more strength to our elbows in the coming years.
