

From the Desk of the Editor

Fourteenth issue of Reason-2015 is by this time ready to publish and steps are being taken to complete the publication process within this March 2016. This issue contains research papers from diverse areas- starting from sedimentation of a river in the Sunderbans through structural engineering, manufacturing Technology, control engineering, communication engineering, electrical engineering, image processing, data analysis with regard to teachers' training to prediction of success of Bollywood movies! Hope readers will find the articles interesting, and would get enthralled into doing further research in some of these areas.

In 2013, this publication of Kalyani Government Engineering College was renamed to *Reason - A Technical Journal* from the previous name of *Reason - A Technical Magazine*. All the articles published in Reason since 2011 were made freely available on-line in the college website, <http://reason.kgec.ac.in> and www.kgec.ac.in. However, due to Internet hacking of the college website, the website has been started to get upgraded gradually. Hopefully within a short time, the articles of the Reason published since 2011 will again appear in the college website. The sincere endeavour of Mr. Tamal Biswas, a B.Tech passed out student of 2014 batch from the Department of Computer Science and Engineering of this college, should be remembered for introducing the Reason web page. The guidance of Shri Koushik Dasgupta, Assistant Professor of the Department of Computer Science and Engineering, is also acknowledged. The process of starting Indexing/ abstracting service of the articles published in this journal has been started. Meanwhile, contents of the journal volume would be circulated through social networking websites like Facebook, LinkedIn, etc. Authors can also freely upload the articles in their personal or institutional repository, and also in ResaerchGate- one networking website among the researchers for wide dissemination of their articles. All the articles published in this issue have been checked for plagiarism using DupliCheck software.

As usual, honorable reviewers have done a great job to improve quality of a paper manuscript through their valuable comments. The Principal, Kalyani Government Engineering College, Kalyani, is always a source of inspiration to bring out this journal. Members of Editorial Board have also given their advice whenever asked for. The Editor also thanks all concerned who have extended their support. The contributors of articles must be acknowledged for submitting their articles to this journal.

At the end, as a customary, I wish to make a Call for Manuscripts for publication in the next issue (Vol.XV, 2016) of *Reason- A Technical Journal*. Conference organisers are requested to contact the Editor for publishing few selected articles presented in it. Institutions are requested to subscribe this journal for their Library.

I am happy to announce that the Organising Secretary of the 28th International Conference on CAD/ CAM, Robotics & Factories of the Future (CARS & FOF 2016) held at College of Engineering and Management, Kolaghat, West Bengal has already forwarded few papers for consideration for publication in this journal. This would be included in the Reason-2016 hopefully. The Organising Secretary of the 5th International and 26th AIMTDR Conference, 2014 held at IIT, Guwahati has also allowed to publish few papers presented in the said conference.

Best wishes to you in this colourful Spring Season.

Kalyani
March 09, 2016
